reaches Kizii, settler named Clutterbuck at Molo, sun very trying, vivid descriptions on way. Nov 10 "Great day: Left Camp at 7 a.m. & by 8 a.m. we had killed a big Bull Elephant. Shall never forget sensation of first sight of elephant at close quarters", describes in great detail. "Found track of a Bongo in the jungle", Egyptian Geese. "Another blank day", "despair in our hearts ... food running short", "awfull grass jungle", Major Carnegie's Farm, kills Topi & Kongoni, "met young Kermit Roosevelt" (at Njoro), who'd shot 2 Bongo. "Wonderful luck a very nice boy, hard as nails & open as anything, no side at all. He had got 48 different Mamals in 8 months & was then on his way to Mombasa to get a Sable in the Shimba hills, Lord Delamere (Hugh Cholmondeley, pioneer settler in Kenya; owned 100,000 acres in Njoro district, inaugurated research on wheat breeding). "Found Delamere was out with Roosevelt trying to get a Bongo", shoots a Bustard; "Perhaps we may run across a lion", passed a gold prospecting Safari, kills Cheetah, L. shoots Kongoni, Zebra, warthogs, hyena, jackels: L. shoots a Chandler's Reed buck", "unfortunately a doe", Eland herd, L. gets 1 lioness, at end of 16 days Safari had killed 28 beasts "I have done

well. I have worked very hard & enjoyed it all enormously": on Christmas day sees Oryx & shoots two; Masai Country "the promised land", meets Sir F.J. Jackson, Lt. Governor; meets Van de Weye "looking like a freak escaped from Barnum's". "also J. Elkington whom I have not seen since I left Eton", etc. etc. At end of this journal is list of animals killed. The journal beginning Dec 20. Arrives in Kilindini Harbour met by McBride from B.E.A.C. dined at Club, "C. & self fit though glad to get off boat", train to Nairobi see game from train, Infant Ward, van de Weye, Bates, Delamere, Elkington, Fitzgerald (in the Blues & just in off Safari), German friends, etc. uses his "new maulicher to shoot Grants, Oryx, Wildebeest, Zebra, francolins ("for the pot"), porter mauled by lioness, wounds dressed. "The wounded porter is a swell under the circumstances". This journal is equally vivid & full of descriptions of game seen & game killed & at end is similar list of animals, i.e. has "shot 39 different varieties of beasts in the 2 Trips" etc. Both journals bound in buckram over boards, one with marbled sides, when.

District of

Mombasa

Oct 28

Arrived Kilindini harbour 6 am. Been raining heavily. Landed about 9 am & got things through Customs. Hear there has been a wash out on line & an engine derailed & there is small hope of getting up country for next 2 or 3 days.

Received letter from Heat saying we shall go straight up to the Lake & into the Kisii Country. Put up at Grand Hotel in the Gifford, Hugh Grosvenor & Somers. Pretty filthy place, but best in Mombasa. Very hot & very damp. Rain at intervals.

Oct 29

Fishing Seedy, slight touch of fever. Hear no chance of getting away today so take good dose of castor oil & lay up. Quinine & Aspirin in the evening & sweat out fever.

Oct 30

Much better. Hear we can get off at 11 am. Get a carriage with Gifford on the first train. Fortunately take lunch with us. Get about 15 miles & find line not yet repaired.

line

we told that if not repaired by 5 P.M. we shall
run back to Mombasa. However just at 5 o'clock
the repaired engine is got back onto the line &
by 6 P.M. the old rails have been removed and
new ones laid and we are able to start &
get on ~~for~~ bad place without accident -
Good!! We are away at last. Eat the remainder
of our Sandines & bread for dinner & turn in.

Arrived Samburu about 11 P.M. & stopped there
for dinner, so turned out & had some. Not right.

Oct 31.

Arrived Kerani 8.30 am & had some tea.
Hope to see Game presently.

Later.

— delightful run through the Game Reserve
country. Open plains & scrub. Game walking
about quite close to the line. Saw Kougoni, Grants
& Tommies, Impala, Ostriches, Wildbrutes, S. Gaffs
& a Rhino in the evening. Arrived Nairobi about
8.30 P.M. Found meat & Infant ward on platform.
Had dinner & started again 11.45. The Safari had
been sent on. Meat from Muechy - failed to get

Oryx or Sable which he had been after. Splendid (in
after Mombassa. Feel quite different. Quite Cool, about
8,000 feet up.

Nov 1.

Still climbing up. about 7,000 ft up now.
Expect get to our destination about 1.30. Passed
Njoro, where farms look most flourishing. lovely
Country, rather like S. A. Arrived Lambara 1.30.

Saw no game on the way up after Nakusa.
Found the Safari ^{at} dumbuce. Packed up into loads
leaving a certain amount of food at station.

actual Safari consists of ~~27~~³¹ including 1 Gun bear a piece
1 boy between us, 1 Cook, 1 headman & 3 Askaris.
1 Saim & 2 Mules
but the porters also employ boys to carry their personal
belongings - so we march with a Safari of 62.

Did started about 2.15 and did about 7 miles
climbing most of the way till we were over 8,000 ft
up. Camped about 5 PM. Rained steadily for 4.55
lovely Country. Great hills & valleys. Grass up to the
waist but a good path to walk on. woods shyly in
the valleys. Saw no game at all & no tracks.
Dined about 6.30 off sausages & bacon & so to bed.
lovely temperature but as there was no sun, but

May account for it. Camp on R. T. ...

Nov 2. Breakfast at 5, started at 5:30. Trip ...
at Kiangi about 12 or 13 miles. (Nov 2) ... at 10:45.

... thunder storm for
about 2 hours. Then saw such a ...
ants & every kind of creeping thing.

Nov 4

Up at 4:30 & start at 5:30 when it is ...
See to march. Gradually get clear of the jungle into
more open country ...

but like mountain folk lived in the same way.
The country was well populated by the Kipsiri people
who have herds of cattle & sheep & goats grazing about.
They are fine savages, but not quite so fine as the Kipsiri
I met. All the young men have spears & do not wear
much but a single string of beads round the waist. The
women wear a blanket and a good many beads & other
ornaments. Marched into the valley in the middle of 5 minutes
the 12 noon. The hills were little today. Very cloudy
weather & consequently not too hot! We then crossed
a camped on a very pretty spot on the Kipsiri River -
though of course there was a hole in the tree here
or there. It was in an open spot on the bank
surrounded by jungle. Saw no game at all today. Hope
to reach Kishi tomorrow but expect it will be very
tough work.

Nov 5. up at 2:30, marched at 5:30. Reached Kibasi
about 10:45 & halted as no water within several
hours. Badish going & very hilly. Quite open country
but the grass is long & rank & a good deal of short
scrub. Disappointed with spot of Kishi, but hope to reach
it in 5 hours tomorrow. Seen no game yet except
Bush-buck.

Nov 6 Camped on the edge of the bush. Found a
side by side narrow paths. This is a ^{guess} old path. It is
very probably they were part of the herd Stanley & Bill killed 4 out of
a fortnight or so ago. Also fresh tracks of the same
kind. Had a little in the house. I should like to see
the

Nov 7 Got up at 8 - found a man in the house who
said he had been here. He said he had been here
and was nearly well laid out. The District
Commissioner away on Safari but found his 2nd command
a very nice fellow named "Jones". He told us we had come
a good deal out of our way, but could not give us
much information about our destination. He
found a better man to take us to the place we
to visit his place at Molo where he promises us
good sport. Marched again from Kisii at 9:45
and reached our present camp on the R. Rift Valley
at about 12:15. A good road from Kisii, but the hottest
day we have had. Found Sun very trying today. Expect
to reach our destination in 2 days ^{time}!

Nov 8. - Still taking into the blue. Marched from
5.45 to 10.30. Very hot & dry. The

others are suffering from sores, boils, venereal
wounds, sores, cuts etc. Now in the Kivirodo mountains.
The natives resemble the Kisii but we saw more marks,
a string of beads round the waist & some wear and
ear ornaments like all their kind. Not so many game
specimens as the Limbura, but seen a happy lot.
Our camp is generally invaded by a crowd who sit
abreast & chatter with the Fortens. This is now the 7th
time taking into outfitting a shot. Hope our Fortens
may be rewarded.

Nov 9. - Marched from 5.30 to 12 noon. Very hot. Safari
getting rather weary. Camped about $\frac{3}{4}$ miles from the
Ruana. Just before encamping came across a lot
of fresh elephant tracks & actually encamped under
a big tree where they had spent last night & been this
morning. Native Kivirodo hunters shot into the
chase so we have sent out boats to locate them.
Filling into Sunday, shall take a dose.

Nov 10. -
Great day! Left camp at 7 am and by 8 am

we had killed a big Bull Elephant. Shall never forget
Sensation of first sight of Elephant at close quarters. We
got within about 50 yards of a herd of about 12 in a
small clearing in the forest. There were 2 good bulls but
we had previously decided to both fire at the same, so
we selected the biggest. I fired a 'Heat's eight barrel
rised fire. The Elephant spun round in a circle and beat
himself with his left hand on the shoulder. My gun became
in his excitement fired me 375 also. Meanwhile a
cow elephant about 200 yards from our feet had got our
wind and came straight for us cutting through the
trees so we had to hunt in all directions & in a place
it. Fortunately she lost our wind & stopped before she
saw us. Meanwhile our bull had fallen, but 2
Cows got one on each side & raised him and they had
straggled off after the rest of the herd. He was lying facing
with blood from the lungs & was easy to follow and
we came on him stone dead about 400 yards from
where he had been hit. We estimate the tusks at about
150 lbs the pair. Great luck. The hunters set to and began
to carve him up & presently our porter arrived and they swarmed
all over him & go straggling off with enormous bundles of
raw & bleeding meat on their heads. Meantime I sit by the

R. Parak till 11 am when I go ^{to} the bank to C. & S.
How on the way some people walk into the bank
in the tree trunk sand and to stop a bus to go
before the ^{of} wind. I had ^{now} the bank to
state & saying what was the after Hippo.

Nov 11. - usual tremendous thunder storm, only horse
prevented us going out yesterday afternoon.

Breakfast at 6 am, left camp at 7 and got back before
12 noon without seeing elephant & found no tracks later
than an hour's night. Saw some cow water buck and a salt's
antelope. Awfully hot. Not very healthy climate & I am
both feeling a little sick.

Nov 12. - went out this morning after Hippo. Found
2 big ones lying under some bushes. We took one
Each died almost simultaneously. How then hit his ~~or~~
well on the head & I hit mine close to the water line
in the side of the head. The devil of a connection in the
water & both disappeared. The gun fires once we go
up stream & find the other was dead. We followed up
stream for a bit but failed to see him & then waited
for the one that had sunk. Returned to camp about
midday. It had done or both may float tomorrow.
Elephant has moved off towards Kessii - so

Antlers about. Hope they may be back tomorrow or
day after. Found track of a Bongo in the jungle. 2
Egyptian Gase came & settled within a few yards of me
while sitting quietly, eating a few figs. Very pretty down
on the Pika but terrible hard work getting through the
jungle along the Elephant paths. A native has just come
& produced an old iron spherical bullet he had cut out of
an Elephant's head, so he had had a dose some years ago.

NOV 13

Another blank day. We were out all the morning in
search of game but did not get a shot. Saw good many
water Buck Cows & 2 bulls. Elephant has moved some
way off evidently. Nothing has been seen of either hippos,
so suppose they were not dead. Han decided to move
on a day or two tomorrow with a few porters in search
of game.

NOV 14

Left our Camp at 6:15 & marched across the hills
& to a Southern direction & we camped on the left bank
of the Savi stream at 8 am. Sounded several shots
in the jungle. Found 3 or 4 small birds
in the morning. Found a few small birds
in the morning. Found a few small birds.

About 11:30 a.m. I shot a bird
falling back to camp. It was a
young water bird, possibly a
Scaup. I saw it again and it
failed to fly. It was probably
a Topi.

Waterbuck Cows and Bulls
were seen in the area. I saw
one of the cows with a calf.
The cows were grazing on
the grass.

I saw a large
bird, possibly a
Scaup, in the water.
It was swimming
towards the shore.
I saw a large
bird, possibly a
Scaup, in the water.
It was swimming
towards the shore.

At 11:30 a.m. I shot a bird
falling back to camp. It was a
young water bird, possibly a
Scaup. I saw it again and it
failed to fly. It was probably
a Topi.

Nov 16.

Left camp at 5:40, marched back to our last camp & came right on towards Kisii. Encamped on the R. Rana at 12:10. Very hot. One of our leopard cubs is dead. Hope to hear news of elephant at Kisii.

Nov 17.

Left camp 5:35, reached Kisii at midday. Safari got in 1½ hours later. Had lunch with Mr. Clutterbuck & Mr. C. Going to dine with Samley. Hear from Jones that our tusks weigh 95 & 88½ lbs. Much better than we hoped. Elephant are reported rather

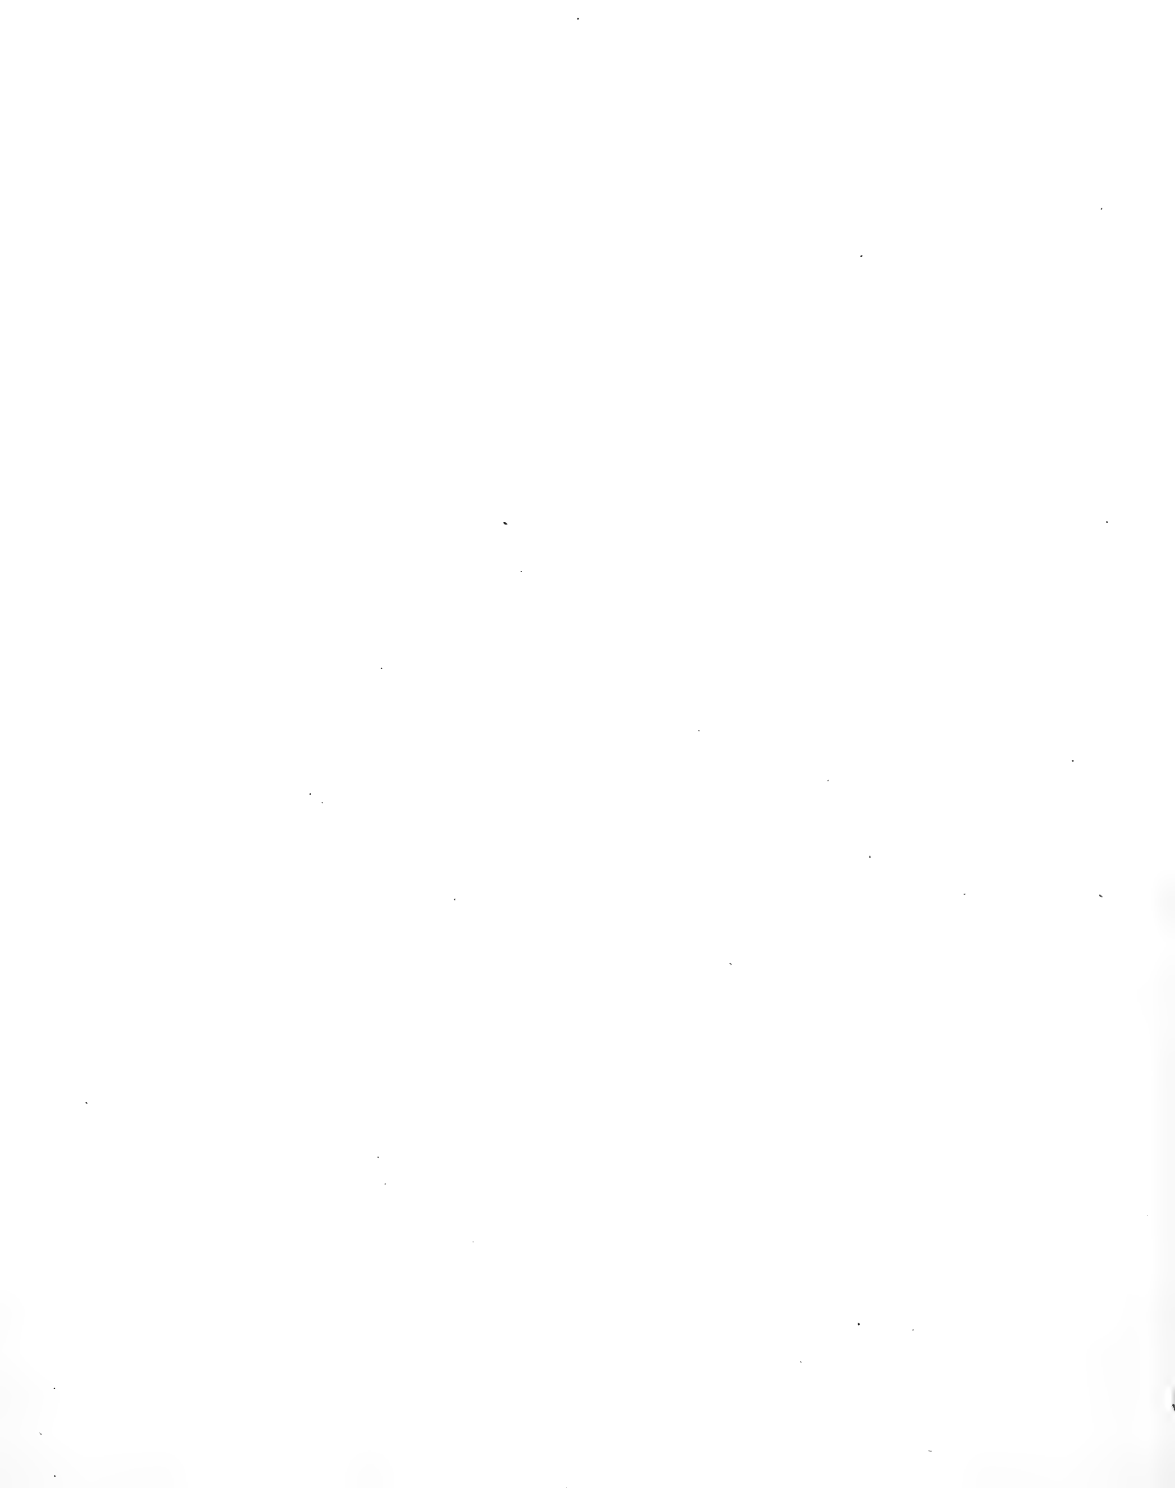

Vaguely in the vicinity about 1 day's march away.
 Hope to hear something more definite presently.
 Nov 18.

Left Kisii about 7 a.m. Arrived at our present
 Camp soon after 10. Encamped on the R. Kiija.
 Elephant are reported to great distance away,
 hope to be able to get near them tomorrow.
 Terrible wet afternoon. Our 2nd leopard cub died
 yesterday on our march to Kisii. Another hare is
 reported out after our elephant. Passed a Gold
 prospecting Safari this evening. Our Cook
 and 1 Askari have failed to reach Camp. Are
 believed to be lying drunk at Kisii. Dinner
 doubtful tonight!!

Nov 19

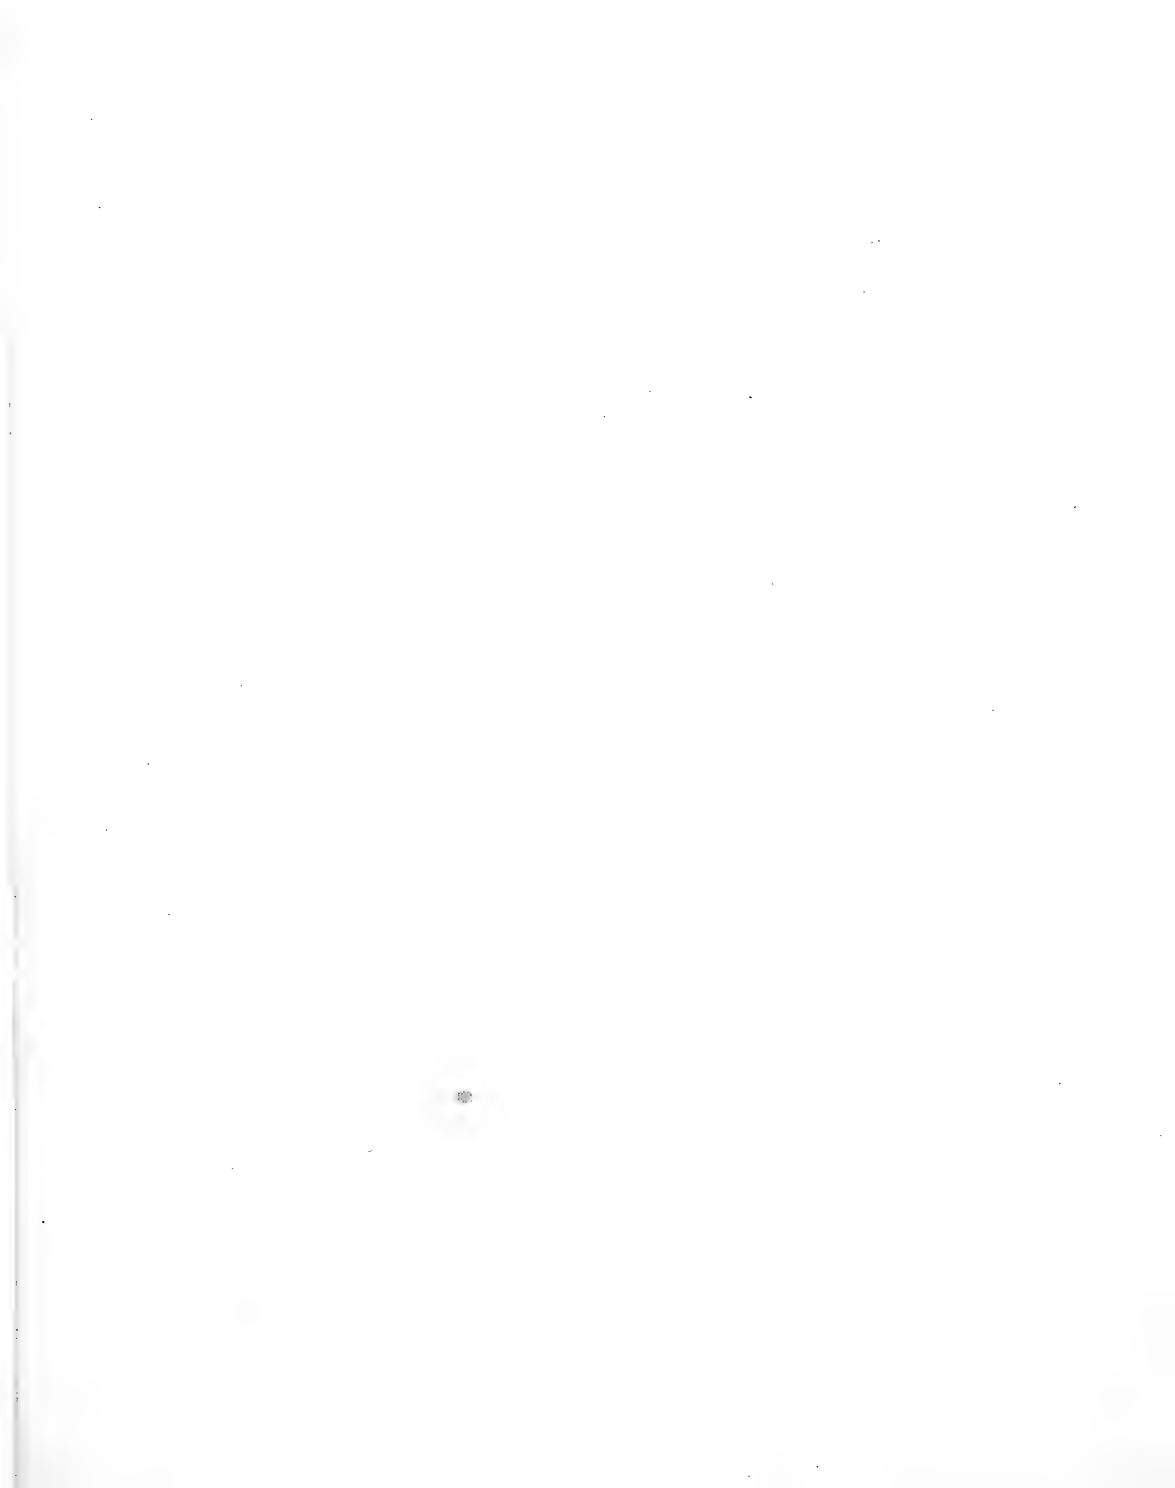

Arrived at our present Camp. No news yet of elephant
 except that they have been travelling fast & far without
 stopping to sleep, but the natives seem to know the
 direction they have taken. Came on to pour about
 12:30 and had another soaking afternoon & evening. Cook
 arrived in time to cook dinner last night. Askari arrived
 this morning & got the sack on the spot. Saw old elephant
 tracks this morning also Rhinos & Buffalo. Marched

Most of the morning through dense jungle of grass & reeds over 10 ft high. Very tiring.

Nov 20.

An Excellent day. Put out about 1000 traps. They were set about 1000 ft apart. I had a hasty lunch, packed up my traps and pitched camp at 11.00. The elephants about 2.00. A herd of 10 appeared. A hill in the distance about 1 1/2 miles each way, from each side of the river. A forest estimate says there are 2000 and the East was scattered about in patches of 100. Probably the few that were seen were the first. The grass in the forest is of a good quality and entwined with creepers into a dense jungle. It is very difficult to the elephants, but terribly tiring to us. Part of course there are of course on the short grass' apparently the same as the forest. The wind was about a good breeze from the blowing from the same direction as the forest.

The general trend was strange. I went with the [unclear]
 [unclear] & stalked down to a party on the left
 [unclear] but had to get up [unclear]
 [unclear] chopping about [unclear]
 to some other party's [unclear] side of the
 valley. But when it half a mile a shift in the wind
 got them a shift of [unclear] then sent her and
 Suspicions. [unclear] with
 good tracks who went off [unclear] under a tree
 & waited. By [unclear] the [unclear] moved
 off and the [unclear] a little [unclear] till
 5 P.M. we started down of the [unclear]
 and [unclear] [unclear] [unclear]
 within [unclear] [unclear] [unclear]
 come [unclear]. [unclear] [unclear]
 growth of [unclear] in the open without [unclear]
 [unclear] [unclear] [unclear]
 he turned back [unclear] [unclear]
 we got him over [unclear] of the head and
 down he went. [unclear] in knees & made
 an effort to [unclear] [unclear]
 again and he walked up to [unclear]
 The stalk lasted nearly an hour and he [unclear]

He is quite as big as our first one or are his tusks, but the gun bearers say he is very very old and altogether he is a splendid beast. He tapers about 11½ feet at the shoulder. We had to leave him as he lay & start for camp at 6.15 as dark was falling and though we had rather less than 2 miles to go - it took us 3 hours to force our way through the grass lighted by hundreds of fire flies. A pint of champagne & a good dinner & bed at 10.15. So ends an skintful & successful day.

Nov 21.

Left camp at 6 am. marched in the the Safari to a spot about ½ mile from our dead elephant in the Valley they all were yesterday. Pitched camp at 9 am & sent out Scouts. We got no word till 1 pm. When a herd of about 100 were reported. However they were moving away & we had no chance of getting to them. Walked up to see the dead elephant & found the natives had almost cut him up altogether, not leaving much more than the skeleton. Very good pair of tusks, but not so heavy as our last ones. We guess them about 75 & 70 lbs but they may be more. Our mules have been away or are lost in the grass - a terrible loss. Our knees are in a dreadful state from forcing our way through the grass. over

The tusks measure $7'1\frac{1}{4}$ & $7'1\frac{1}{2}$ and the forefoot
measures $4'11"$ round.

NOV 22.

Worked in Camp till 12 Noon when word to us
brought of elephant some way away. Went off to see
and got in sight about 1.30. Most of our friends of
the other sex were in sight, about 200 in all, but
all in getting parties alone or in pairs. In kind
of a party of 4 or 5. We stalked down
to them, but they were feeding on the high grass and
could not see their backs. They appeared to be 2 good
Bulls but we could not see them clearly. We waited
within 100 yds of them until a chance for shot
till the herd off we followed parallel to them crossing
2 scrub 4 times till we probably got within about
50 yards & saw them clearly feeding on some scrub
bushes. They turned out to be all cows, one especially
being very big & old in the long tusk. So we retired without
killing them & got back to camp at 4.30.

We went out to see for a short time in
kiss. To walk work getting through the brush as
10 feet high & forcing our way through the great flags
in the swamps, sometimes up to our knees in water.

A disappointing day.

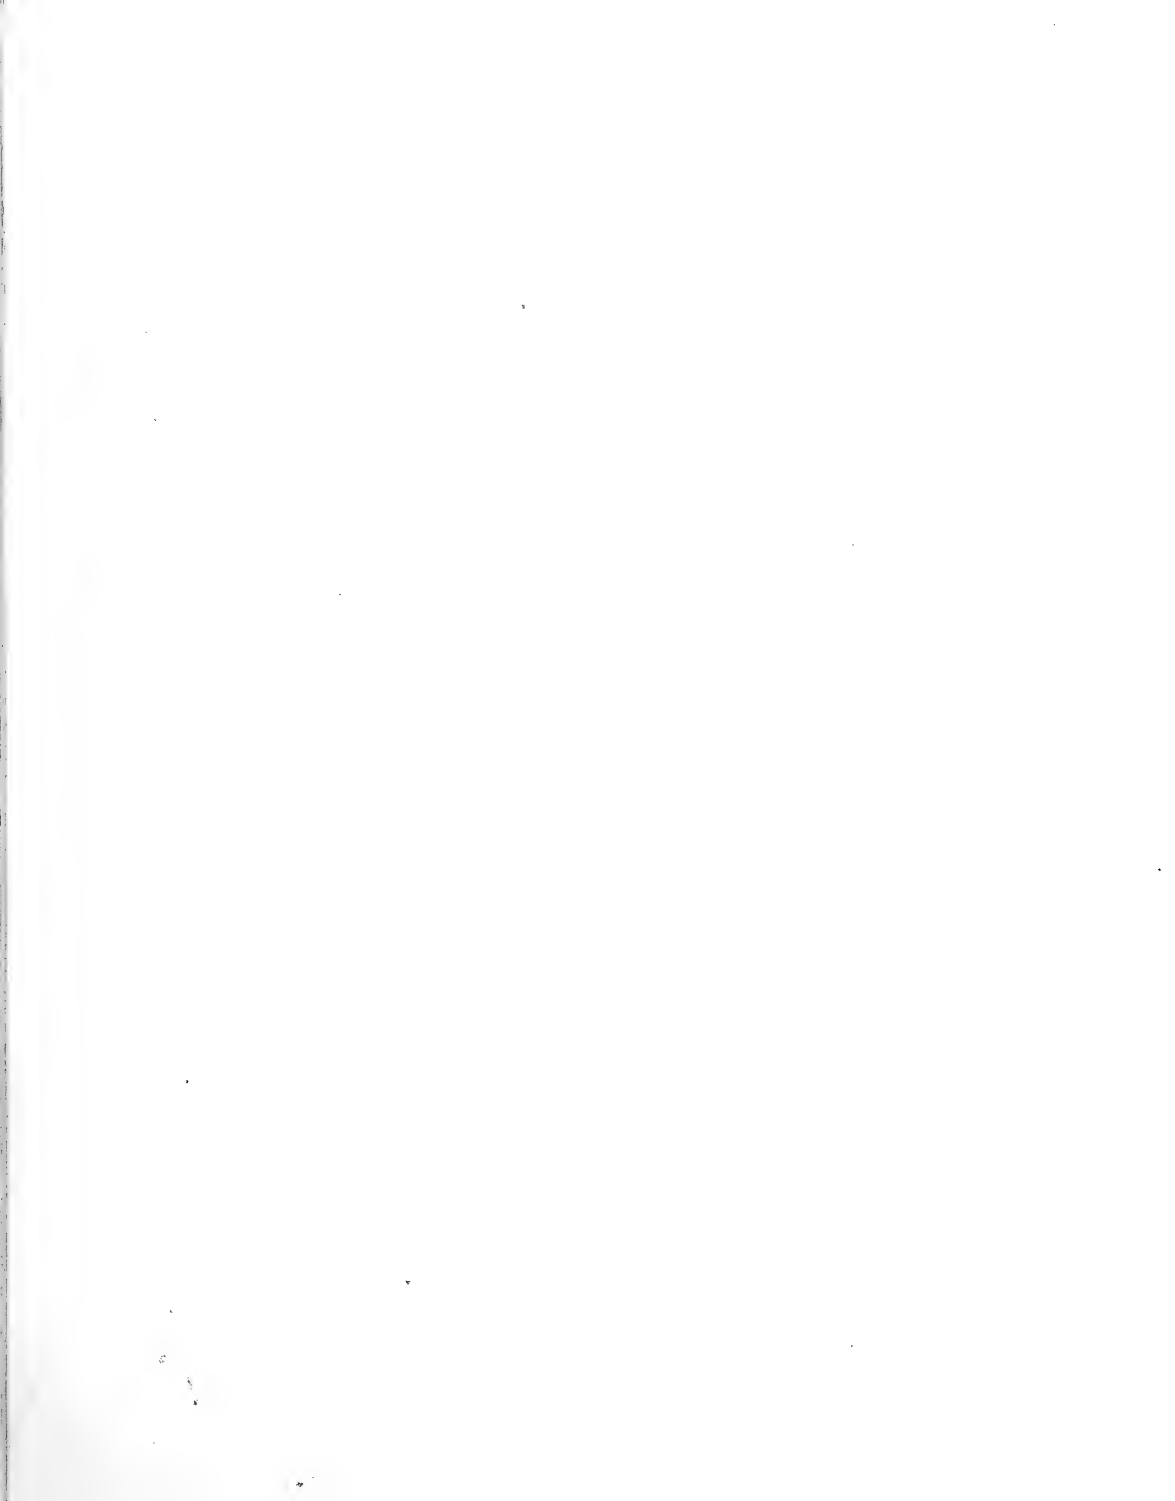

11423.

A Black-tailed Deer. If a 18. in in a horse head
 shot. Got within sights of three or four horses
 but, being so close to the shot, the deer
 was up to the point of the horse's head.
 A good steady wind blowing from the east. He went out
 3 good balls, one horse by horse coming a good
 tick and a half. He balls hit well in the middle
 of the head & would not get near enough to shoot.
 Suddenly, about 12.45 the settled down to rest,
 one ball being on the outside & the big one and
 another in the middle, surrounded by two small
 ones. He got in so close that he had to be 100 yards
 & tried to see how close he was to the horse.
 He had a look at the horse's head & saw
 a hole in the his 375 & 500th by 577, both riming at
 the head. The ~~the~~ ball stayed almost still, but
 in a second 2 cows had him propped up one on
 either side and all went off in a bunch across
 the point going west the way of a second shot.
 The went into a hollow close to the light and he
 had to shift in case the shells were close to
 his light in wind. The ball was hit in

before we went
 down to see they had been and to honor! There
 was a small one stone road about the kind the
 year. Moore had seen him to see him fall
 & he does not know how he had been shot. The bullet
 apparently hit the struck bone. The Gentlemen say
 the bullet went in above ear of the big bull and
 hit the eye, but it hardly seems likely. What seems
 more probable is that as I fired about 1/2 a second
 before I did, the bull was half turned his head at
 the shock & being glanced off his skull. Any-
 how there was the young bull stone dead & his
 tusks will make the 50 lbs allowed by law.

About 100 Kisii turned up from nowhere & fell to like
 wild animals - in 2 or 3 hours only a few bones remained.

We tracked our head some way but in the dense
 grass jungle could find no traces of the wounded
 bull - so back to camp with despair in our hearts.
 Our Safari is 2 days ahead & food is running
 short. One Askani & the syce are somewhere in
 the Blue searching for the males which have been
 found and after that time are such a breath of this
 awful grass jungle & elephant hunting! The

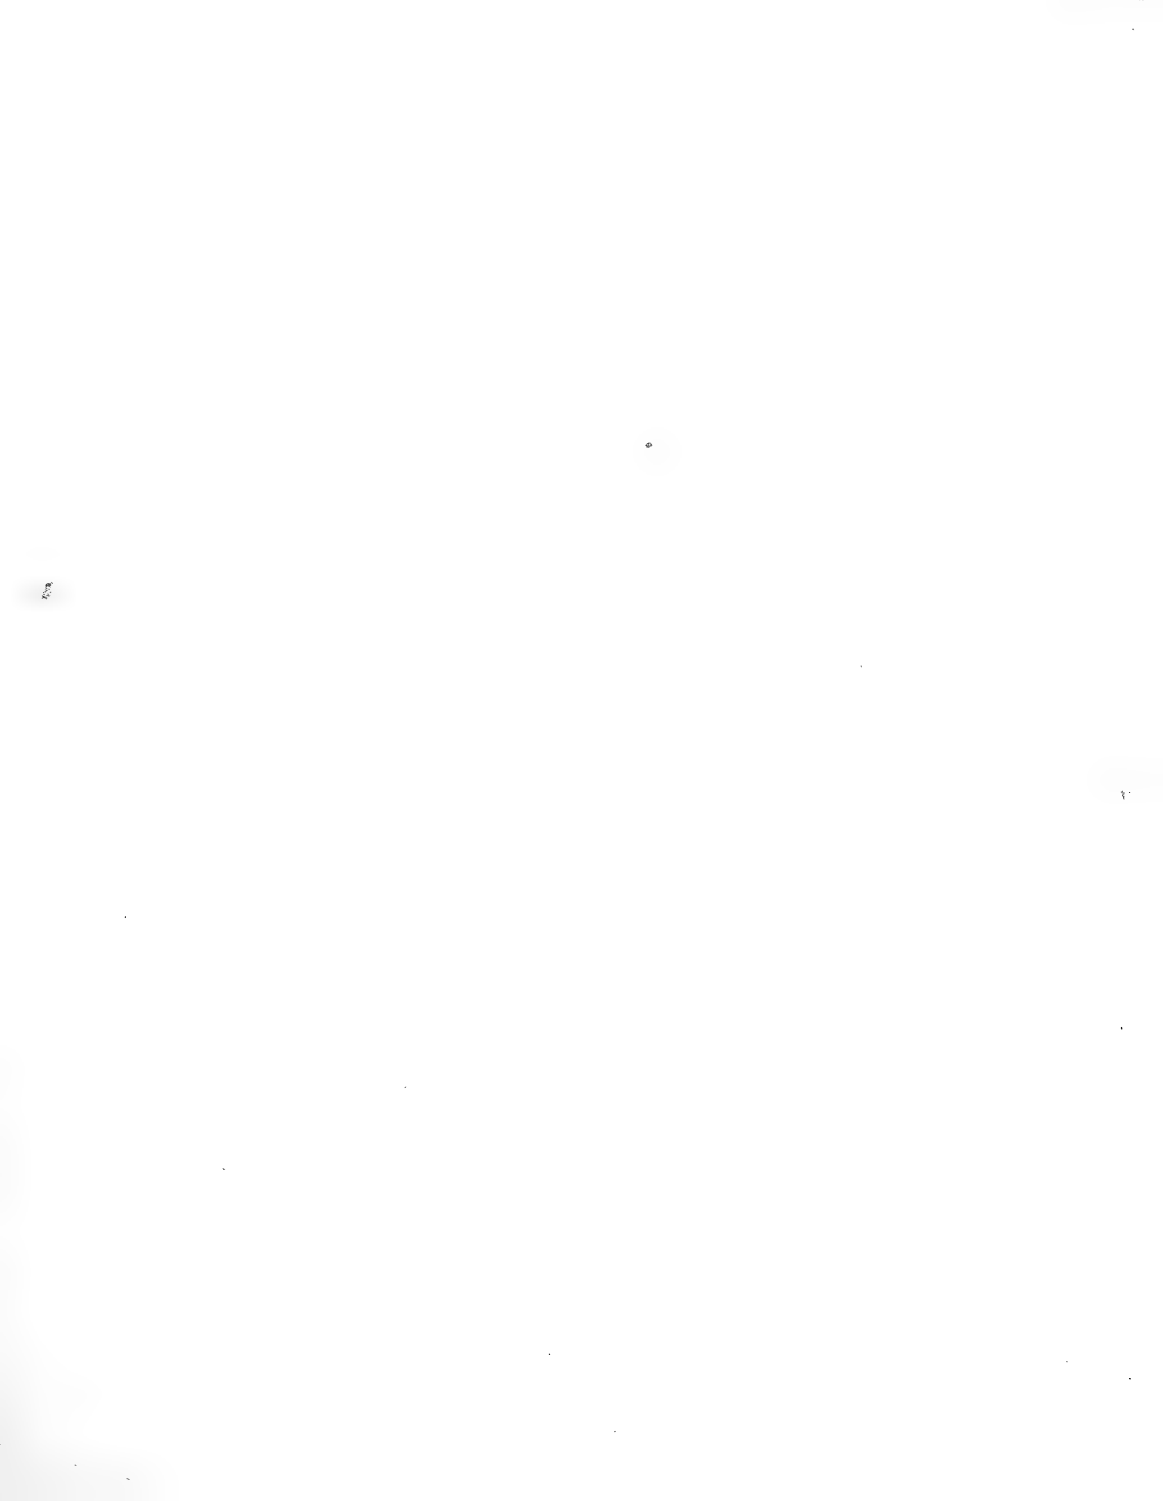

Stores are getting short & on the whole still.
 Elephant hunting is also a bit of a problem in the
 limited time, but the main thing is to get the stores.

NOV 24

~~Left Camp~~ at 8 am about 12 Elephants came
 to visit our Camp, but as there was no good Bull
 amongst them we fired a shot to scare them &
 went off S. E. to look for them. About 10 we saw
 5 enormous Bulls - a gigantic one without tusks
 & nearly as big with splendid tusks & one slightly
 smaller one. They were moving pretty fast and
 we, on the inside of the curve kept pace with
 them till they stopped. We were commencing to
 go down to them when some Cows & calves came
 along & they all went off together across our front.
 After a bit they all stopped in a thick bush of
 those trees, but as they were all in a mass, we
 could only sit down & watch for them to separate.
 No more attempts to shoot a Bull out of the
 middle of a herd after yesterday's experience.

About 12 noon in the outlying barrens the party
 sprang into activity. We imagine a little shift or
 freak of wind may have carried our scent nearly

$\frac{1}{2}$ mile to them. One hour off is what the cows & calves
 & smaller Bull, while the 4 Big Bulls made straight
 for us seated on our hill as hard as they could come.
 For a moment we had hopes a wild hope they
 were coming for us for the hill was true a very steep
 & we could have given them cause, but they turned at
 the foot of the hill and passed 400 yds in front of us
 & went off in a gigantic circle till they joined another
 party & went off. So as time was going, I returned to
 camp. An interesting day if the impossible one.
 We had seen the hairless Bull the other day. He is
 undoubtedly the biggest we have seen and the master
 of the lot. This is probably the end of our elephant
 hunting as we shall have to tick tomorrow probably.

No news of our porters yet. We shall have to go
 somehow or the other to get them. They have already taken
 13 days or a two days job.

Nov 20: Off at 5:45 & struck hill 12 noon, hard work through
 the dense grass. Only made 7 or 8 miles in 6 hours.

Hope to be out of the grass this time tomorrow. No news
 of our safari. Saw about 1000 elephants & some along
 in 2 three herds, but made no attempt to follow them. Killed a
 Snake in camp.

Nov 26.

off at 5:30, I marched till 11 am. We are now on our old path to Kencho where we turned off to go to Kisii on our way down. We are clear of the Elephant grass and it is pretty good going from now till we strike the Kencho Sotik Road. Saw 2 or 3 Reed Buck on the track & went out this afternoon & each killed one. We each had a very difficult shot at Bush Buck also but failed to get them. I killed his Reed Buck with a wonderful shot in the dark after getting back to camp. Awfully wet evening, no chance of drying our things.

Nov 27.

off at 5:30 I marched till 11:15. Nothing of any interest to record. Very wet afternoon. The ~~beads~~ beads we purchased from the porters from the local chief as well as a calf. I made a great shot at a Kite flying over camp with his little rifle. We heard that the other half of our Safari passed through that country only 3 days ago on their way to Kisii, about 5 or 6 days late. So no chance of seeing them for about 10 days.

Nov 28.

off at 5:40 I marched till 11:45. In the only one half of 15 minutes. Our Kisii porters tired out by the march.

distance. I have stopped the train some 30 miles
 short of K. the distance in a single day. The train
 is 14th of the year. They have at least
 1000 in some country. The train porters
 are an excellent set of the best waiting for their
 wages so the porters have been very well
 treated.

65th

Left camp at 8 a.m. and travelled to the south
 side of the river. Saw a few other
 houses about 10 m. It was the same old
 with a few more. It was a good day. The
 water was very good. It was a good day.
 The water was very good. It was a good day.

transferred my attention to a large bird
 of prey perched on a tree in the distance
 in fact was an eagle with its wings
 the biggest and the fiercest I had ever
 seen. It was a young bird of prey in the
 early part of the day. The way he galloped
 on legs was astounding. The chase lasted a
 hour while nearly the whole day and a good
 deal of the time spurring him by his blood. After
 making a big circle he turned & shot down
 close behind the eagle's form. The latter saw him
 but did not start. Then he turned his
 head & I got back to my post soon. I heard
 the shot & it was for the whole time and I
 submitted to it. I still got the pit!
 He killed 2 ~~hens~~ back to the point of his wings.
 plenty of meat in camp at last. a mail out. god!!

Dec 3.

A bad morning. I started after a herd of horses
 which were just settling down after their morning
 break. I got close enough to shoot a little way when
 I took a difficult riding & I thought the horses.

I had this morning a very early start
 and did not see of almost anything of
 them. I had some about eight or ten
 which I had seen in the morning. I
 did not see any more of them until
 a just possible chance in the long grass. I raised
 my gun and fired. It was a very close
 shot, and I was very much surprised
 to see all four of them bounded toward me. I
 fired a second time and they were
 down. I was very much surprised to see
 them so close to me. I was very much
 surprised to see them so close to me. I
 was very much surprised to see them so
 close to me. I was very much surprised
 to see them so close to me. I was very
 much surprised to see them so close to
 me. I was very much surprised to see
 them so close to me. I was very much
 surprised to see them so close to me.

 me. I was very much surprised to see
 them so close to me. I was very much
 surprised to see them so close to me.

The little table & benches got within shot at 4.30
 (3000 yds) up into a thick forest. It got very dark in a
 little while. He and a small party of boys and other
 companions kicked him up & after talking several times
 with the boys & the girls he went back
 to camp at 8.30 & by 9.00 he was at the top of the
 spin about 7.15. A very large & a small stock
 of food was taken in afternoon & killed a Topi.
 It is a bit better but not flight.

Dec 4.

wrote letters & did various odd jobs till 11 am, when I
 started out. Came across 2 who had shot a Topi and
 a stray Roan. The latter was a bit of luck as they
 are practically unknown here. I was in search of
 Kongoni but I was a long time finding any. I eventually
 came across a large herd, but on trying to stalk them
 found they were absolutely unapproachable. I walked
 after them till I got within 500 yards when I sat down
 and fired with the telescopic sight & made a lucky
 shot, killing one stone dead. He had a bad head which
 I did not shoot, & then I went back to camp about 3.30.
 I bagged another chick he says, though I see feet
 of it. He is quite Seedy.

Dec 5.

Trekked into Ino Station, the porters making 9 journeys to bring the stuff. Packed up skins and heads & sent them off to Nairobi also packed one chest box to take with us, sending everything we do not want to Nakuru. The last half of our Safari arrived this evening, having been absent since the 12th Nov when we sent them to Lumbwa for supplies & supplies; Got a sharp attack of fever, but a little better tonight. Intend to keep you a kept Bush of the 10 if he is fit enough to see to them.

Dec 6.

L. Swaso much better. Trekked through the Inao Forest till 12.15. Amful had going & Ky had work for the porters with loads on their heads. The path had been very roughly cut. Interesting going through the dense tropical forest with every where dense masses of foliage & vegetation alive & drizzling. We camped on the edge of a great deep gorge with the river flowing underneath. Had to chop & clear away trees & branches to pitch tent. After lunch I & I went on to look for the path across the river & found none. We had come to an impasse. It might take weeks

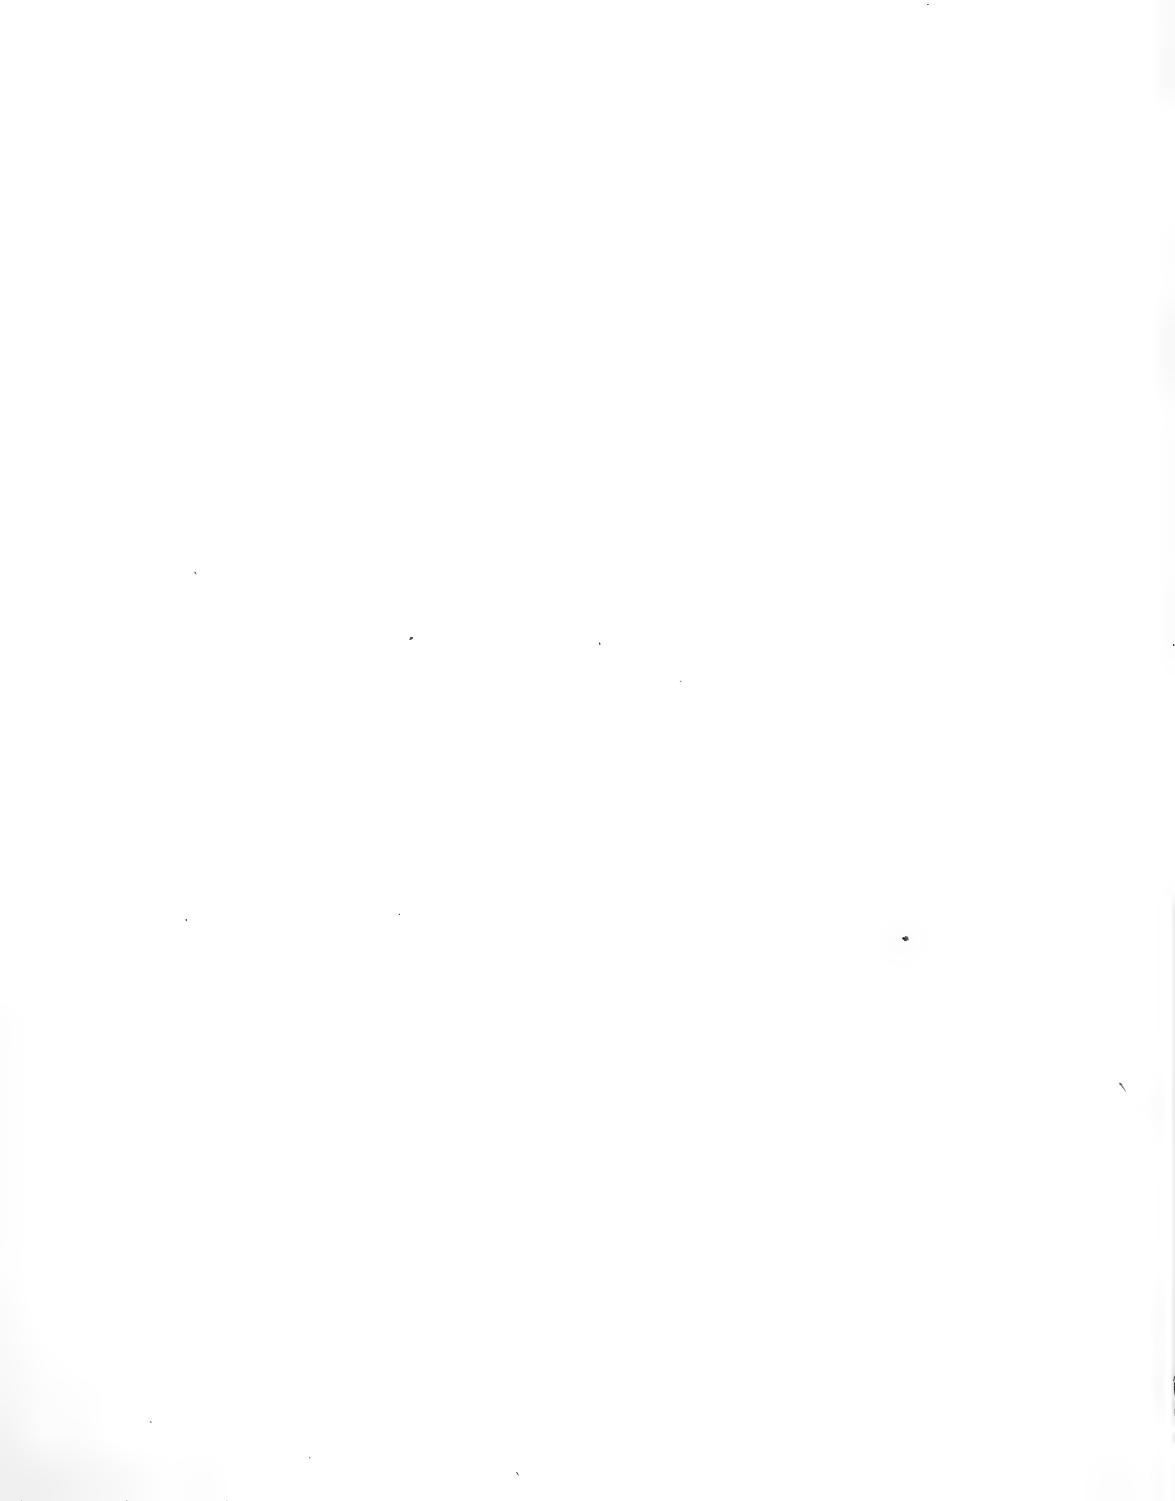

or months to cut our way through - so nothing for
 it but to retrace our steps tomorrow & train to Njoro.
 It only wanted this to bring our bad luck to a head.
 2 more precious days gone out of 8, perhaps more.
 Justly our camp was the remains of a burnt tent
 & some bones where a white man had come out
 to try & get a Bongo 10 months ago in the 6 porters. The
 Nandi had come down & murdered him & 5 porters &
 burnt them in the tent, but the 6 Ebo had escaped &
 had brought the news & the Nandi had been pitifully
 "paga". I have quite recovered but looks pretty poor.
 Dec 7.

Marched back the way we had come and
 arrived quietly at Kato Station about 11.30 am.
 Spent the day there & caught a train about
 5.50. Trained to Njoro where we arrived soon
 after 7 P.M. Met young Kermit Roosevelt there
 who had just come in to catch the train. He had
 been out to Cole's farm & shot 2 Bongo. Wonderful
 luck. A very nice boy, had as much spear as
 anything, the side of a stall. He had got a different
 kind of spear in 8 months & was then on his way
 to Nantasa to get a Sable in the Shimba hills.

Spent the night in the waiting room at Niiza.

Dec. 21

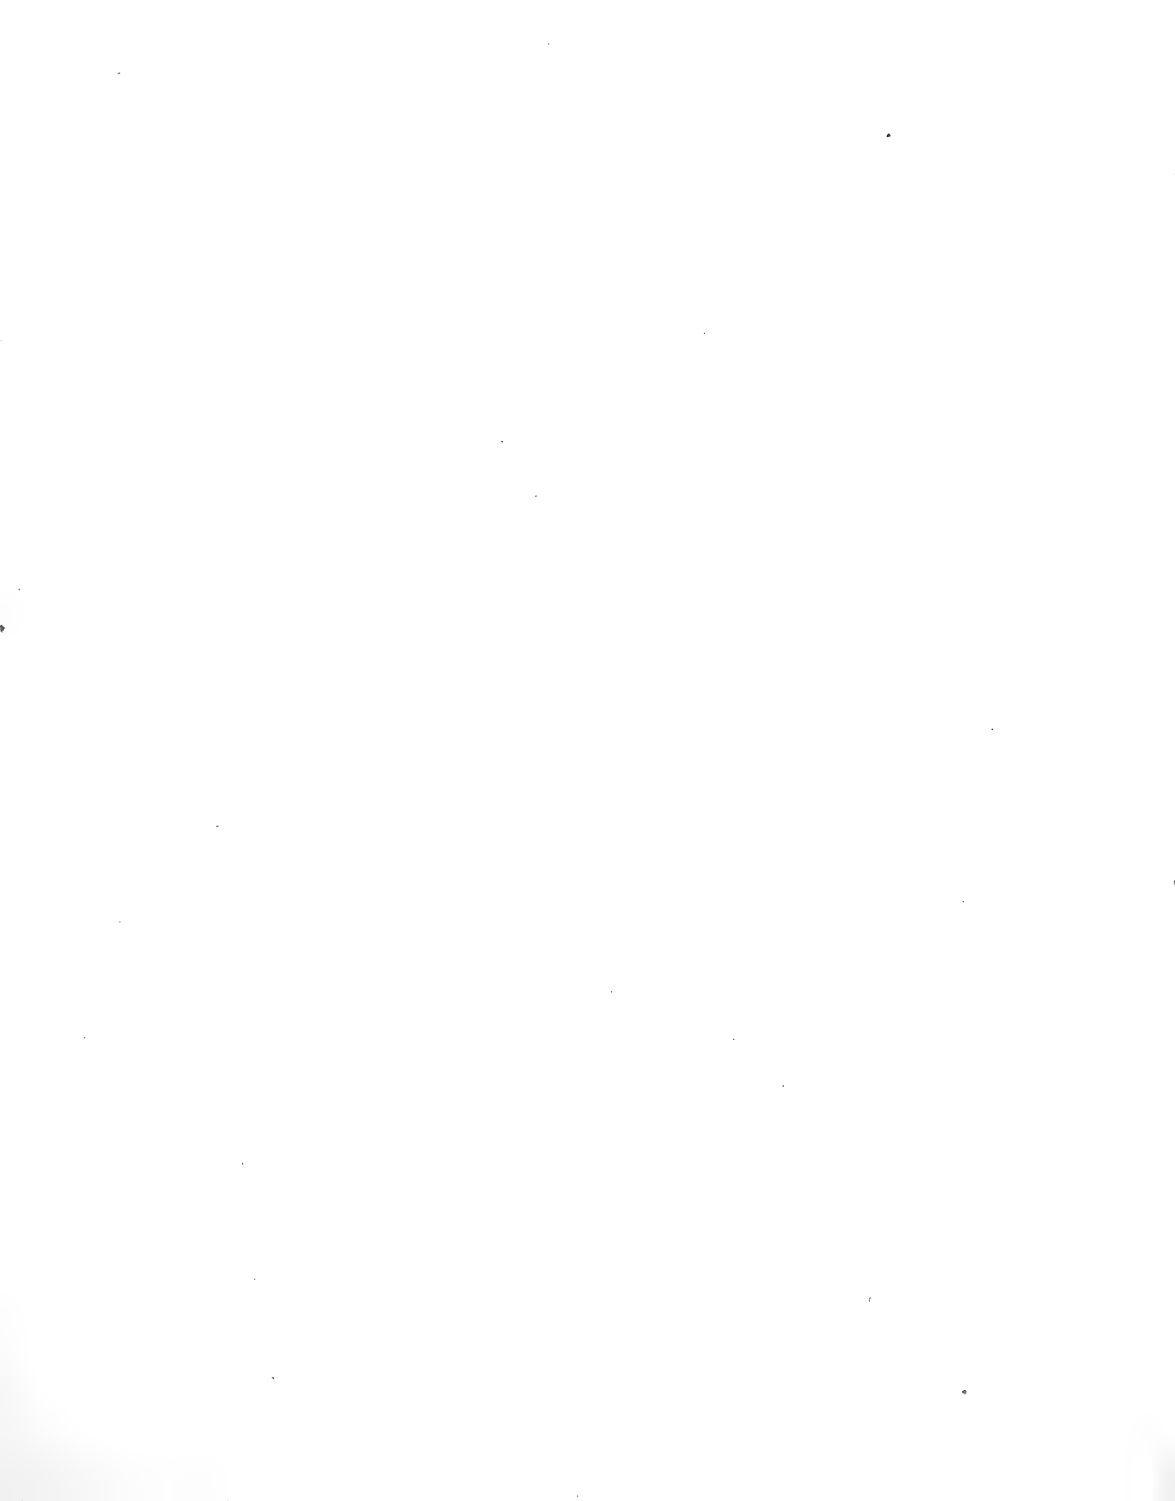

Today I believe sent in a haul out for 4 birds
 to the station & we soon were to get the file,
 evening about 4.5. found a house and went
 into the forest to find by the house. Spent the
 morning there, took a lot of pictures, about 100
 of them. I also saw some birds in the forest.
 I did not catch any birds, but I saw some
 very interesting ones. I saw a lot of birds
 in the forest, but I did not catch any.
 I saw a lot of birds in the forest, but I
 did not catch any. I saw a lot of birds
 in the forest, but I did not catch any.
 I saw a lot of birds in the forest, but I

 in the forest, but I did not catch any.

[Faint, mostly illegible handwritten text at the top of the page]

... about a mile from camp, I
 saw something just more in the way of a
 yard to the back. I saw a bear in a
 bush. I saw it first as it was
 sunning itself and I fired. It fell
 in front of me. I made certain it was asleep, & lying down
 as if it were dead. I went back to my
 tent. After a while I went out and saw
 right past me. Not having seen me, with its rear fore
 leg broken at the shoulder. I gave him another shot
 as he passed me and grazed his shoulder against
 the other fore leg & killed him. Thinking he
 might break I gave him a third shot in the ribs,

23

The next day I went back hunting the lioness
like before. I shot 2 lions this morning & several
Stein-buck & deer.

I went in at 3:00. I saw a lioness & a lion
- 1 lioness, 19 & a cub, 2 & a lion's back &
& 2 lions. I went on the lioness in the lioness pass, she
stopped to look & I had time to get up off
the side & shot her in the throat, killing her instantly.
She had a cub with her, but I did not get off
with the lion.

I went back to the lioness & was just getting
close again when a Stein-buck jumped in front of me
& I shot into the middle of them, starting them
off into a zig-zagging me a shot. back at 6:30.

Dec 13

Off at 6:45 into London, I visited the lioness's
den in the hope of finding the lion & cubs, but
saw nothing of them though we hunted all the
country round about. I got a good weather and
had a long shot at some Grant. Saw my amount
of 2 has a kengri with some other things
pig. he went to look for the lion & lioness a
quantity of ground, but found nothing to shoot.

and went to the kitchen and took out
 the coffee and sugar and took
 about 4:15 - along had had the last
 joint hit. I was sitting at the
 table by the time the coffee was
 the time less back. I saw the two cats
 on the lawn and quite sure that they
 about the same time. This morning
 I was sitting at the table.

I was sitting at the table and
 the ground was covered with
 for me to take a break. I was sitting
 when I saw a mouse run to the end
 of this table.

Reached 11:55. We were sitting
 about 1/2 mile from the camp. We
 of some place and went after them.
 to take a break. I was sitting
 making the coffee. I started the
 stand off before we could get a shot.
 after them in a while, rather to get it up.

We spent the day at Nakama, sorted
 in various

to receive. Handled rolls of photos
Kermit - better on the whole. Born to be
photographer - working in a way that - these
pictures are taken in the house of officers.
No more being taken - the mission...

Dec 17.

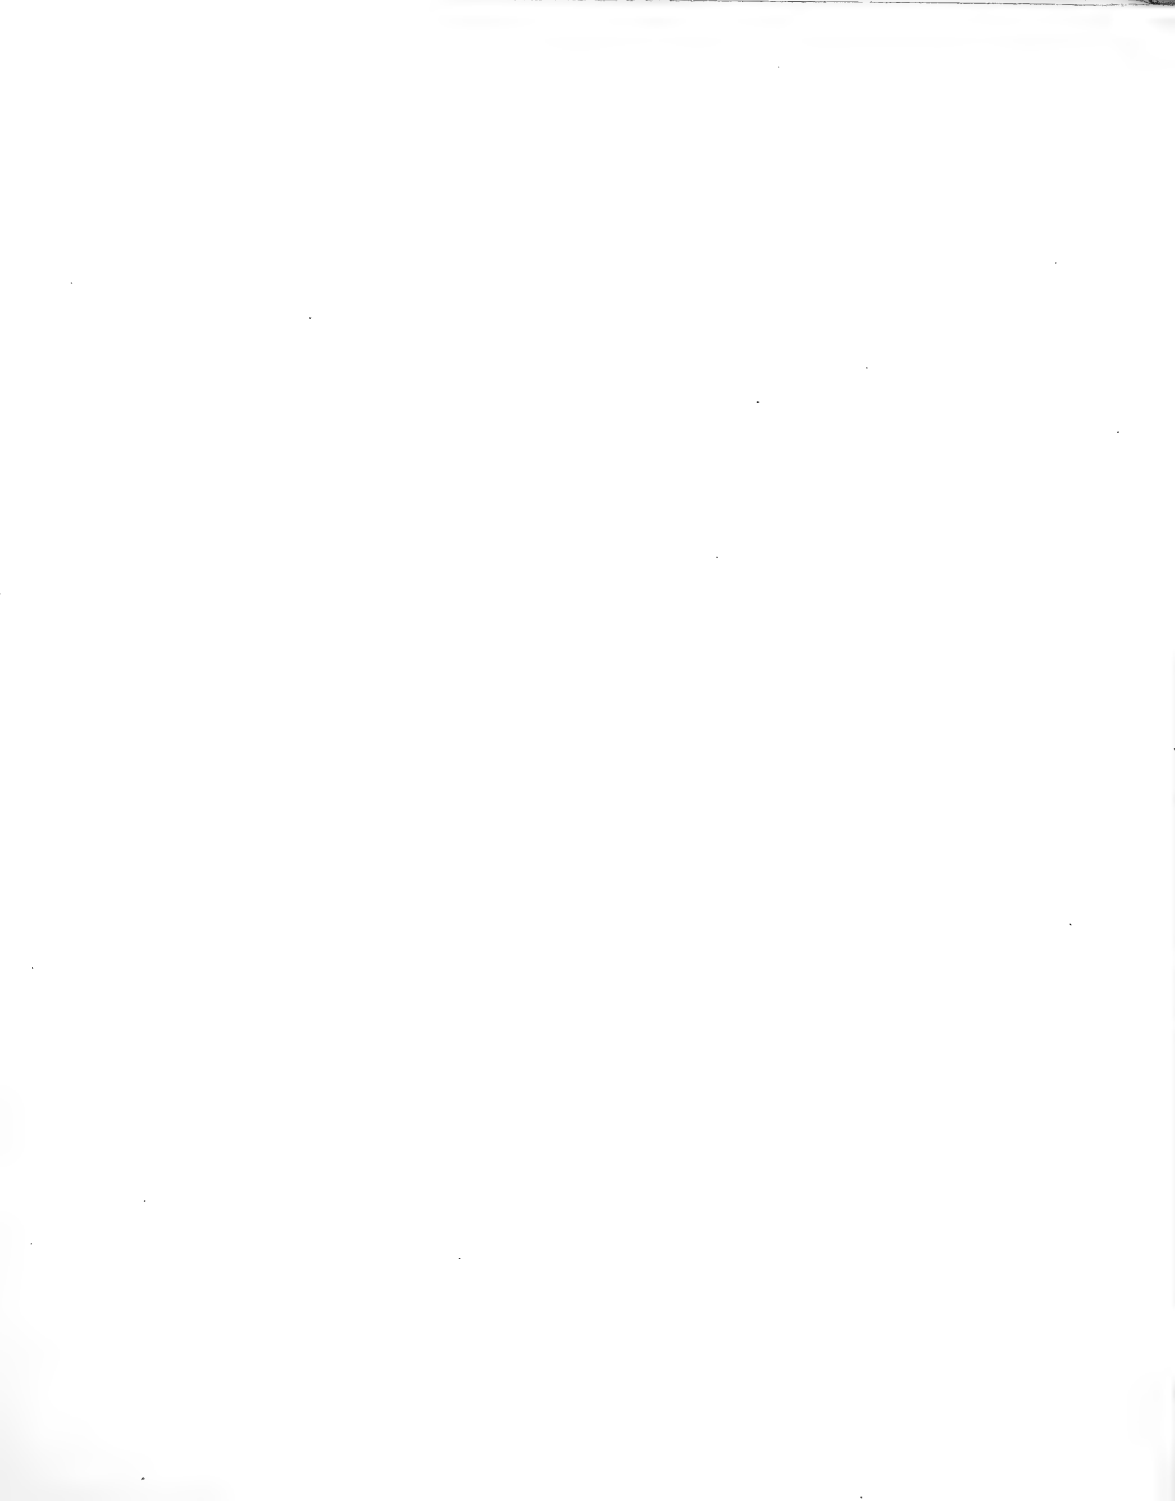

Dined with the Cranworths last night & met Jackson
the Lt Governor. I left midday today, rather Seedy
again.

Dec 18.

Dined with Infant Ward last night - a cheery party
including Kermit Roosevelt. Met Gifford at the station,
he & another fellow had got 5 hours in 2 days.

Started about 1 PM in same train with Roosevelt
& party on their way to Uganda & home by the hotel.

Warmly greeted by my Satani at Nakuru,
where we arrived about 7 PM. Find one man with
broken head, another with another part of his face
damaged also by a stick. Expect the whole lot have
been drinking. Saw Gol Furch, who has supplied
me with a guide & gave me tips.

Sept 19
~~1908~~

Late getting off this morning, as usual when leaving a Bona. Woke up from 7 am till 12 & ensambled on the river near Flewmen's farm. Went to see the latter twice, but cannot get hold of him. Went out at 7.15 & shot 2 Tommies at 300 & 200 yards. Saw 6 Newman's Kougoni close to the railway on Flewmen's farm, but could find no others & did not like to go & shoot his as he had put up a notice prohibiting shooting. Tried to shoot some Bustard, but though I hit two, I failed to get them. I fancy the bullet must have gone through their feathers. I saw some young kestrels but they slipped into the bush before I could get a shot. I saw hundreds of Tommies, but could not shoot any more. There were several pigs but I saw some with good tusks. Saw some Gullies across the road & shot 1. Saw some of the first down hill shot at which Grant & I were away home. As I was going into camp, I just shot a few more. I slipped off my rifle & the dog stopped to look at me about 100 yards off. I fired & shot his face right off. Rather a gallery

Sept 21 Bright.

Dec 10

Sept 25.5, a white tile 11 am I encountered in a valley on the R. Magella. A them sudras bit of collier work through the Karshat mts. Through some open bush & dense forest into open country. Remind me of the High Veldt in S. Africa. Some a bushy ch & water back soon after starting, but too far back to go after. Went out at 2 pm. Before starting we left a whole monkey in the forest, and a very different sort which I didn't get. - - - - -
 passing to my right, the forest, the night.

Dec 21

Sept 26.5, a white tile 11 am I encountered in a valley on the R. Magella. A them sudras bit of collier work through the Karshat mts. Through some open bush & dense forest into open country. Remind me of the High Veldt in S. Africa. Some a bushy ch & water back soon after starting, but too far back to go after. Went out at 2 pm. Before starting we left a whole monkey in the forest, and a very different sort which I didn't get. - - - - -
 passing to my right, the forest, the night.

Some forest. They were polytoma and depth to 150 yards. I shot the first one I could see, a nice tall. He disappeared behind a bush, but I saw behind it

in the right place. I then got right up to the bull,
 amongst them. A bigger bull. I got him and I must
 have hit him. I was in the air. I got a
 solid bullet into his side as he went. I went in pursuit,
 the wounded bull exhausted from the other day in the
 the bush. I finally found him lying down and I saw
 the road off and I went off to the back.
 I unfortunately had no more softwood bullets so I
 shot him with a hard bullet. As it was
 he could not rise long and I am sorry for him to work
 as losing a good head. The first one was dead.

No game here where we are encamped. It is a
 Masai game and the cattle are very scarce.
 I hope it will be warmer tonight. I would not sleep
 for the cold last night.

Dec 22.

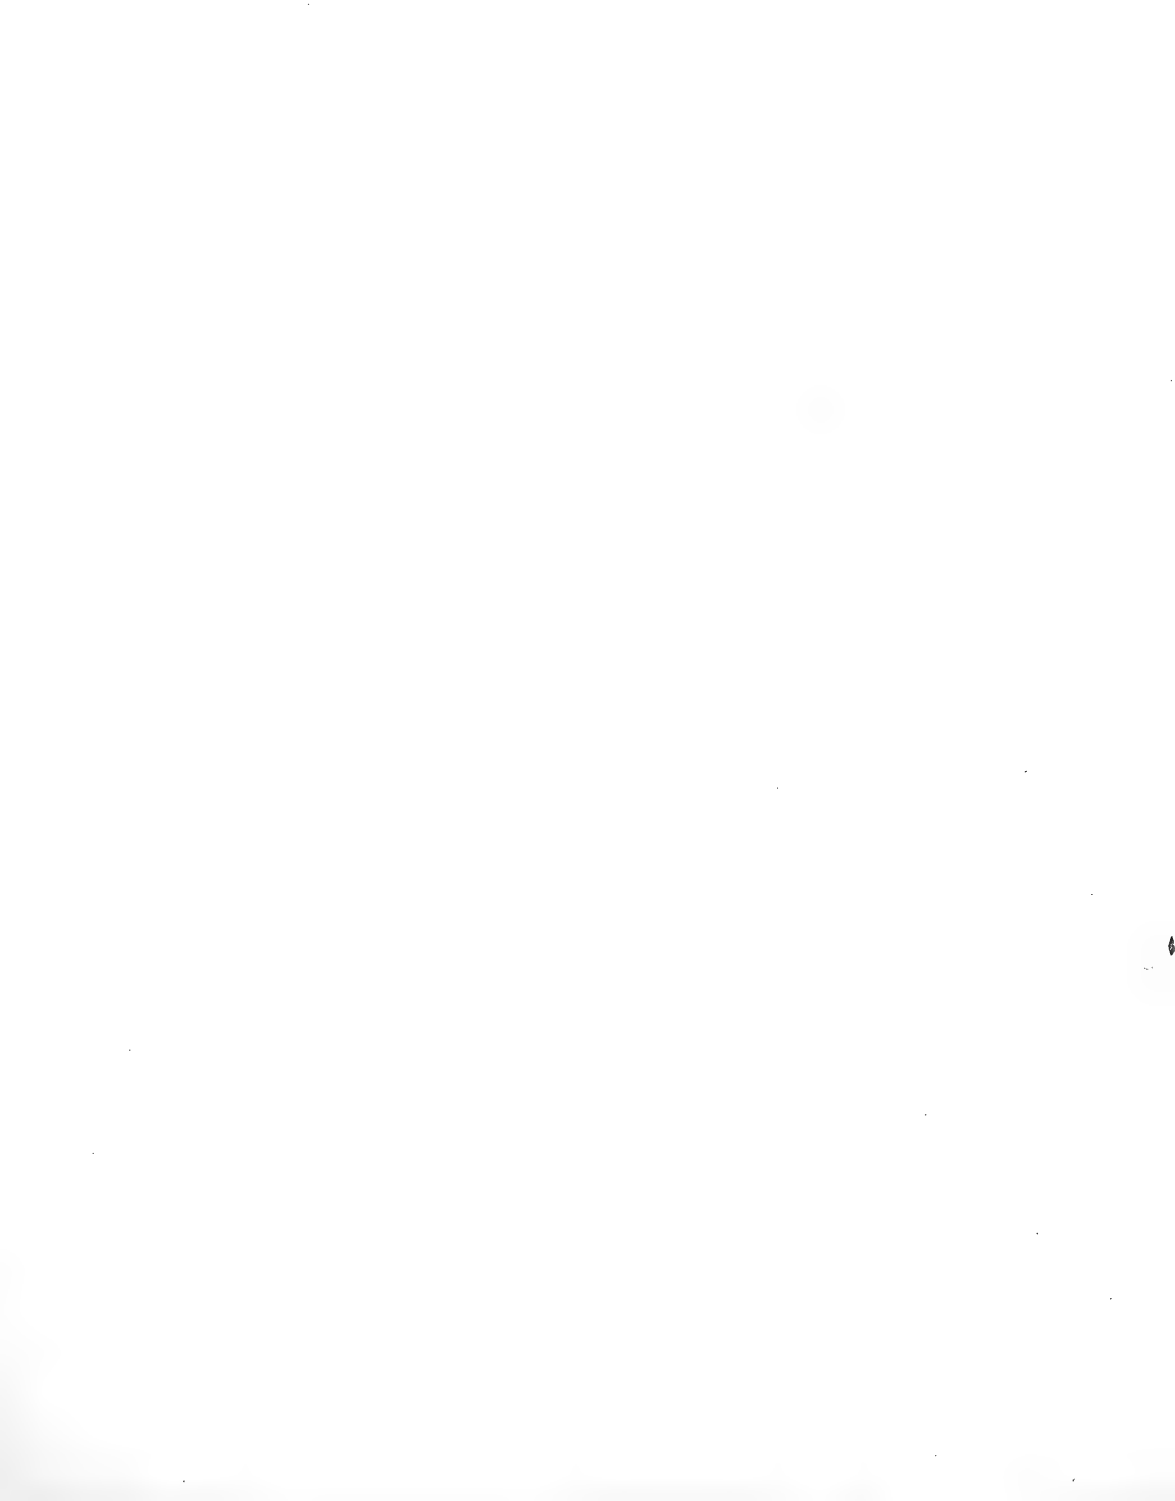

An awfully cold wet morning. I awoke from 5:00 to
 12:30 & encamped on the edge of the forest. Saw nothing
 but a few kongoni. Went out at 2 P.M. and shot
 a herd of kongoni that were in an unappreciable number,
 but they were not taking any. I then tried to shoot for
 a monkey or bush buck, but found nothing. Back at
 5:30. As I write, a horn is making Kslaki Quil. See

5:00 p.m. Still 2150 ft. Coming out of the forest
 to find a large, small stream this side of the river, but
 only see the sun. The heat is a bit more and
 that however to the sun hill & acc. This is brass,
 but I fear by next day it will be gone.

Dec 20th

A very hard day. Off at 5:30 and only reached
 Pun-Rutti & camped at 2:30. I showed 40
 miles in two hours of about 30 minutes. The
 path was alright but the ground is terribly hard
 & stone. I have skinned a tiger and am weary. We
 camped at a good camp 3 miles in from
 so must be a few miles. About 10 minutes
 from our camp we found a lion's footprint. I forgot
 to ask someone the lion had killed a tiger last night.

I was still searching & searching for a
 once. We came first through a big hill of forest
 & changed into pretty open forest. Here I saw
 Slant & Taha. I had a talk, but on getting close
 found only one bull, with moderate head, so
 left him in the hope of finding something better
 presently. We came on the first one of our
 descent into the valley's droppings. He appeared

The first thing I did was to go out
 and see what was going on. I
 found that the men were all
 sitting on the ground and
 looking at me. They were all
 very quiet and I felt a little
 nervous. I went over to them
 and asked them what was
 wrong. They told me that
 they were all sick and that
 they had been sick for several
 days. I told them that I
 would try to help them and
 that I would give them some
 food and water. They were
 all very grateful and they
 told me that they would
 follow me wherever I went.
 I then went back to the
 camp and told the other men
 what had happened. They were
 all very surprised and they
 told me that they would
 go with me. I then went
 back to the sick men and
 gave them some food and
 water. They were all very
 happy and they told me
 that they would follow me
 wherever I went. I then
 went back to the camp and
 told the other men what
 had happened. They were all
 very surprised and they
 told me that they would
 go with me. I then went
 back to the sick men and
 gave them some food and
 water. They were all very
 happy and they told me
 that they would follow me
 wherever I went.

through the forest at 2 o'clock. The
 group of 20 men and 10 women
 were walking in a good line.
 The forest was thick and the
 ground was very soft. The
 men were carrying loads on their heads
 and backs. They were walking
 in a single file. The forest was
 very dense and the ground was
 very soft. The men were carrying
 loads on their heads and backs.
 They were walking in a single file.

I got to the camp at 5 o'clock. The
 camp was very quiet. The men
 were sitting on the ground. Some
 were smoking a pipe. The
 camp was very quiet. The men
 were sitting on the ground. Some
 were smoking a pipe. The camp
 was very quiet. The men were
 sitting on the ground. Some were
 smoking a pipe. The camp was
 very quiet. The men were sitting
 on the ground. Some were smoking
 a pipe. The camp was very quiet.

That was the first time since the
 spring of 1911 that I had
 drunk any beer. I had some of
 my good beer. I was very
 thirsty. I had wandered some
 distance and I was very
 thirsty. I had wandered some
 distance and I was very thirsty.
 I had wandered some distance
 and I was very thirsty. I had
 wandered some distance and I
 was very thirsty. I had wandered
 some distance and I was very
 thirsty. I had wandered some
 distance and I was very thirsty.

The forest was very dense and the
 ground was very soft. The men
 were carrying loads on their heads
 and backs. They were walking
 in a single file. The forest was
 very dense and the ground was
 very soft. The men were carrying
 loads on their heads and backs.
 They were walking in a single file.

The weather is very warm. The ground is very hot and the grass is very green. I am very happy to see the grass so green. I am very happy to see the grass so green.

I am very happy to see the grass so green. I am very happy to see the grass so green. I am very happy to see the grass so green. I am very happy to see the grass so green.

I am very happy to see the grass so green. I am very happy to see the grass so green. I am very happy to see the grass so green. I am very happy to see the grass so green. I am very happy to see the grass so green.

I am very happy to see the grass so green. I am very happy to see the grass so green. I am very happy to see the grass so green. I am very happy to see the grass so green. I am very happy to see the grass so green.

The first thing I noticed when I stepped
 out of the plane was a warm blanket of
 humidity. The air was thick and sticky,
 clinging to my skin. I had heard that
 the weather in [unclear] was perfect,
 but this was something else entirely.
 I was young and full of life, just
 out of a [unclear] - and the local
 hidious heat was a very interesting
 contrast to the [unclear] I had just
 left behind. I was walking down the
 [unclear] street, feeling the sun
 beat down on my head. The air was
 so thick that it felt like I was
 walking through a wall of [unclear].

Jan 3rd

A Sad day! Such kind for a few at afford ...
me a chance for my second hand, but defaulted
to take it.

Reached at 5 ... on ...

From a hill of forest Saw 6 Plain Vulture
 An was perched on top of hill. They were flying
 in the air at a distance of about 1000 yds
 about a mile away from me. They were
 in the air, so I shot at the top of the hill
 stopped several of them. The
 I saw one was shot ^{again} ~~at~~ ^{at} the top of the hill. They were
 though I was flying on the top of the hill. They
 still was a difficult one - a very small
 of causing it to be a very small one & going to the top
 on my back & shooting a few at the
 exact spot. I shot down for my self
 about 100 yds from me. They had no idea
 idea of my presence and I felt they were behind
 into my hand. They were all plain Vulture but I could
 make out one good Bull with his back to me.
 I decided to take him lying as he was as I could
 see his shoulder & could judge his height. He was lying
 about 100 yds away from me. I had a very steady
 shot and he fell. I had here as plain Vulture
 the exactly what I meant. Up the hill I walked. And
 the hill was across my front still at about 100 yds.
 I was flying as he had not seen he stopped

I took round at about 10 o'clock and I got out
 onto the main road in the morning. I felt I was
 going but he stopped off at 2 o'clock in the
 morning. I had some things and I was at
 it all the time. I was in the morning.
 This pulled him up & then he said he had been
 to the bank & he had some money. I only
 saw him a few days before he left the
 road. But no - away with the cows & away he
 showed up them on stage - 5000 5000. I
 had to go and he had the cows & so on.
 I had to go to the bank & I had to go
 to the bank & I had to go to the bank.

Now I was in the morning the time of all the
 in the morning. I saw the cows
 full up & look & then galloping across the plain
 to join the main road. They were kicking & playing
 & playing & playing. They were kicking & playing
 & playing & playing. The old Bull had
 time to stop, but he pulled along a year & then
 his spring effect. $\frac{1}{2}$ a mile to a mile I watched
 them & then the first small road. I could
 hardly believe it as I got in pursuit. I felt
 the first quiver of losing him. I never let it

where he stopped he died, but my heart fell when he
 sat down in front of me. The water was better than the
 bush to my front. But the grass was very dry &
 with a little wind like a storm of rain. I was
 surprised. I was surprised when he had left
 the first time. I was surprised when he had left
 for him. All this time. I was surprised when
 he had left. I was surprised when he had left
 & I was surprised when he had left. I was surprised
 when he had left. I was surprised when he had left
 like a storm of rain. I was surprised when he had left
 with a heavy rain. I was surprised when he had left
 I was surprised when he had left. I was surprised when
 he had left. I was surprised when he had left
 on the ground. I was surprised when he had left.

We consequently did not make camp till we
 were some way up the valley. I camped
 on the edge of the steep valley of Lake U. Forber.

My gun was not in the state of loose-
 lock then, so I thought I would try to
 now. I had a shot after a while. I was on
 the cliff above to see what I should see.

While going through a patch of thick brush
 scrub. I started some water look gray and a

Safari is the coming in trapping - it was the valley of
myone except myself 9 to 10.

Jan 6.

Settled about the Safari - here the boat is 2 days
late and not go down to the coast before next
Monday.

Jan 7.

Got a Cape Boat at 8 am to the 1st of the
town to the and get a wild hunt. I had some
was off about noon, but all efforts to stalk
them failed. I shot 2 White Kudu - at 400 yards
a 200 yards and a nice 9 - ant. To be the shot
leaving at 100 yards out of the Cape Boat. They
4 miles talked at the shot and we had a great
ten minutes canoeing across the V.D. before we
stopped them. I had a Papaloy Kudu who was
excellent. Got back about 5 pm. A very hot day and
alone to walk, but I got 2 fresh Kudu's through
I tried to get a wild hunt.

Jan 8.

I then returned at 5 pm to the 1st of the hill
I had then and not walk and we got going
up a bit and tried to walk. I had 2

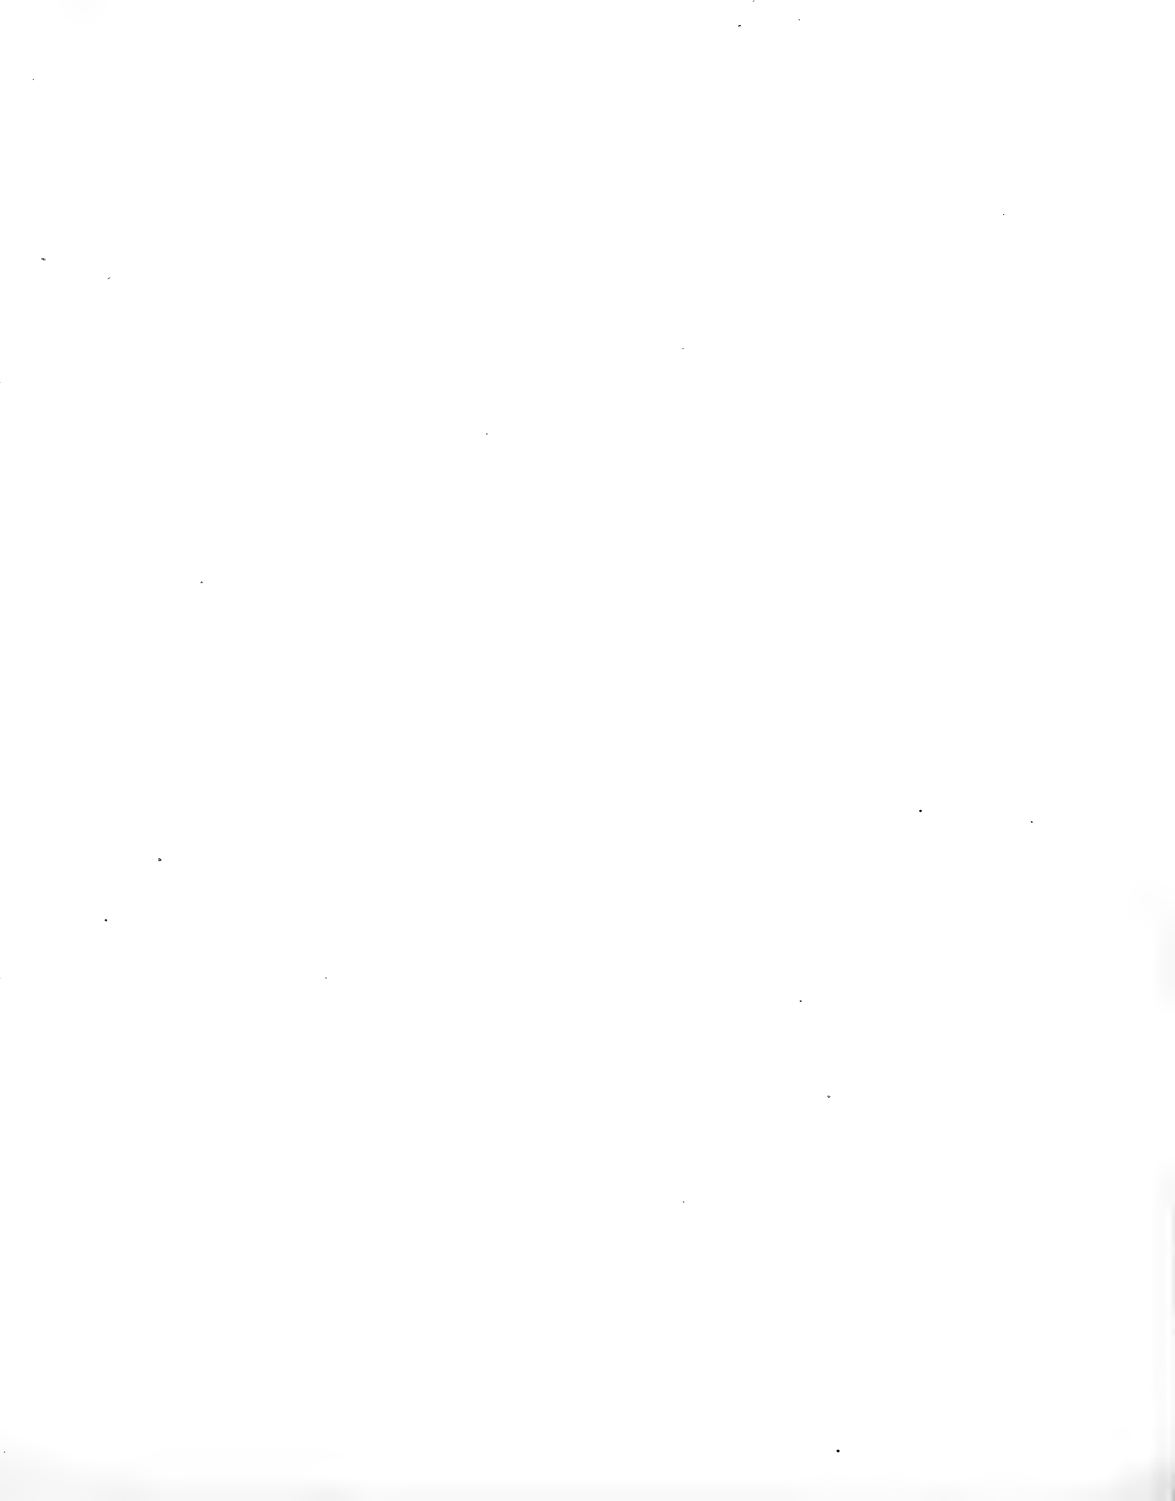

Went out to the traps today. There was
one that I shot so I was. I shot a few head,
so I shot him at the head. I was in the
front some but I shot at all but I shot
them. There were literally thousands of
things I shot at. I was in the woods and
I prevented one getting near. I shot one shot
at 300 to 400 yards but he did not fall
but he went off in the woods and was
in the woods & failed to get him. After many
hours trying, I turned back to the trap line
killing 2 birds on the way. I was not trying
I was followed by a herd of deer, which
I shot one and I shot. Got back to camp
about 5:30.

~~Went~~
I shot a few more birds and I shot a few
but I was not. I was then I shot at a few
but I shot at a few in the trap line.

~~Went~~
I shot at a few more birds, which I
was not trying to. I was not trying to
I was not trying to.
